Game description:

Save our four-legged friends!

Animal Shelter Simulator grants you the opportunity to tackle the challenging but also highly rewarding task of running a refuge for strays and rescues. Witness firsthand how much effort goes into helping abandoned and injured animals as you handle a number of tasks necessary for your shelter to operate smoothly.

Clean Them

Your rescues will need to take a lot of steps on the path to improved health, and good hygiene is the very first one. Get your hands a little dirty so that their paws stay clean and their spirits soar high.

Take them for a walk

What better way to burn off all that excess energy than a good, old-fashioned trot out in the fresh air? Keep your animals stimulated and entertained. You can be sure they'll be starved for attention!

Extend

As you succeed in your efforts, you will be faced with additional challenges. Make sure to turn them into opportunities as you invest in your facilities and expand according to your growing needs.

Convince them

The ultimate purpose of your initiative and the most rewarding conclusion to all of its efforts – when an animal makes its way to a brand new, loving home. Look after your rescues and ensure they are adopted by your shelter's visitors.

Features:

- easy to play and enjoyable gameplay
- many types of cats, dogs and rabbits to rescue
- expand your Animal Shelter with different buildings and colour customisations
- leaderboards and achievements
- lovely stickers (iOS only)

Localisation:

Game is localised for 14 languages: English, Polish, German, Japanese, Russian, Portuguese, Indonesian, Turkish, French, Italian, Korean, Spanish, Chinese and Ukrainian.

About Developer

Digital Melody was found by five friends. We always loved any kind of art (playing together in a rock band, writing books, taking pictures). Finally we discovered that games are something that combines everything we love in art - creation and freedom. Our first global success was Timberman - simple, pixel-art game about lumberjack. Now we still want to invent brand new game mechanics and surprise players with fresh art style. We developed following games: Surfingers, Hardway, Find The Balance, Diggerman and Tap Skaters. With Funky Restaurant we tried to develop "lighter" arcade game, which is directed to broader audience. We wanted to make it rewarding and engage players for longer time (giving the possibility for founding new restaurants and upgrading them).
